TALA MOHAMMED AL-SAFADI

AI Engineer · AI Agents & Automation · Co-founder & CEO @ AI Rank
safaditalaworksp@gmail.com | linkedin.com/in/talasfdi | github.com/sfditala | Gaza, Palestine (Remote)

SUMMARY

AI Engineer and co-founder of AI Rank, an Arabic-first platform for comparing AI tools. 2+ years building web products, now focused on AI agents, RAG assistants and workflow automation with n8n, OpenAI and Supabase. AI & Data Science Engineering student at UCAS.

EXPERIENCE

Co-founder & CEO, AI Rank Jun 2026 – Present
airanktools.com

- Built the platform from scratch and lead its vision and growth, alongside co-founder & COO Mohammed Abu Saada.
- Launched a bilingual Arabic/English directory of 600 rated AI tools, with filters by category and price.
- Delivered side-by-side comparisons across 6 criteria, and an AI Matchmaker that recommends the 3 best-matched tools for a described need.
- Stack: Next.js, TypeScript, Tailwind CSS, Supabase, Vercel, Cloudflare.

AI & AUTOMATION PROJECTS

AI Personal Assistant (Telegram) 2026
n8n, OpenAI, Supabase, Google Tasks, Google Calendar

- Built a conversational assistant for my daily use, where a main agent delegates to Tasks and Calendar agents.
- Synced every task change from Supabase to Google Tasks, and checked the calendar for conflicts before booking.
- Automated a morning brief, an evening plan and a weekly report.

AI Marketing Team (Demo) 2026
n8n, OpenAI, Pinecone, Gemini Embeddings, ElevenLabs, Google Sheets

- Built a multi-agent Telegram system for a fictional café, with an Orchestrator delegating to Content, Calendar and Analyst agents.
- Grounded prices and offers in a RAG knowledge base, so missing information is reported rather than invented.
- Added a human approval gate before calendar changes, plus voice input and output in Arabic and English.

AI Receptionist for a Dental Clinic (Demo) 2026
n8n, OpenAI, Supabase pgvector, Google Drive, ElevenLabs

- Built a text and voice Telegram assistant for a fictional clinic that answers only from approved clinic information.
- Made it refuse medical advice, and give emergency guidance and the reception number instead.

Shadow AI Detector 2026
Python, scikit-learn, Flask, Next.js, Chrome Extension (MV3)

- Led a team of two building a web platform and Chrome extension that warn users before sensitive data reaches AI tools.
- Combined 20+ regex patterns with a custom Random Forest model trained on 675 Arabic and English sentences, reaching about 93% accuracy on the project's test set.
- Finalist in the Palestine-wide Secure Digital Innovation 2026 competition.

PRODUCTS & CLIENT WORK

Modavi, AI Stylist (Client) May 2026
Next.js, Groq, Supabase, Clerk, Cloudinary

- Built end to end a digital wardrobe where AI creates complete outfits from the user's own clothes, with a code check that rejects invalid combinations.

Wejhet Ashwas 2026
Next.js, TypeScript, Supabase, Dexie.js, PWA, Capacitor

- Co-developed with Mohammed Abu Saada an offline-first Arabic study platform for Tawjihi students, live on the web and Android.
- Delivered schedules, focus timers, spaced repetition, mock exams and progress tracking.

Maha Store (Client) Dec 2025 – Jan 2026
Next.js, Node.js, MongoDB

- Built the storefront and admin dashboards for a women's fashion store, collaborating with a backend engineer via GitHub.

Smart Text Analyzer (University, Team) 2026
Python, Trie, Hash Table

- Data Structures final project for text analysis, developed in a team on GitHub.

Personal Portfolio & AI Agent 2026
Next.js, TypeScript, Groq, n8n

- Built an n8n-style Workflow Replay canvas, and an AI agent that uses server-side tools to qualify leads and book calls.

TECHNICAL SKILLS

AI & Automation: n8n, AI Agents, RAG, OpenAI API, Gemini, Groq, ElevenLabs, Hugging Face, MCP, prompt engineering

Machine Learning: Python, scikit-learn, text classification, model fine-tuning

Web: Next.js, React, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, Framer Motion

Backend & Data: Supabase, PostgreSQL, pgvector, Pinecone, FastAPI, Flask, Node.js, MongoDB

Tools: Git, GitHub, Vercel, Cloudflare, Telegram Bot API, Google Workspace APIs

CERTIFICATES (DATACAMP, OCT 2026)

Working with the OpenAI API · Prompt Engineering with the OpenAI API · Working with Hugging Face · LLMOps Concepts · Working with the OpenAI Responses API

EDUCATION

B.Eng. AI & Data Science Engineering 2025 – Present
University College of Applied Sciences (UCAS), Gaza

- Second-year student. Coursework: AI Programming, Data Structures, Data Science, Databases, Linear Algebra, Data Analysis & Visualization.

LANGUAGES

Arabic: Native

English: Professional working proficiency (B2+)
